SUBJ: Twitter Tweet Amendment for Cost accounting

1. As discussed, this is my estimated cost for the work I did myself for the tweets with Twitter. I used my experience as a software engineer and also my academic experience with two master degree; on telecommunication and one software engineering to figure out the cost.
2. These tweets were within the 100 character limit where size of the address counted.
3. There six set of tweets from May 9 to June 6. Each initial set was about 3 million overall tweets at an estimated rate of 0.005 cents per tweet.
4. Total low estimated cost is \$24,000,000.00.
5. This should be eligible for federal matching funding.

Sincerely,

Rogelio Gloria
